

Please see attached list for model with and without welded tubs and large models.

From February 2009 **all** washing machine baffles are to be fixed to the drum using 2 screws.

If baffles need replacing for the washing machines produced in and after February 2009:

- **For the models with welded tubs:** The tub/drum assembly group will need to be changed.
- **For other tub types:** The baffles can be unscrewed and new baffles can be fixed after disassembling the tub.
- **For the large models:** The baffle used for the rest of the models is used also for these models. By this way all the baffles are unified.

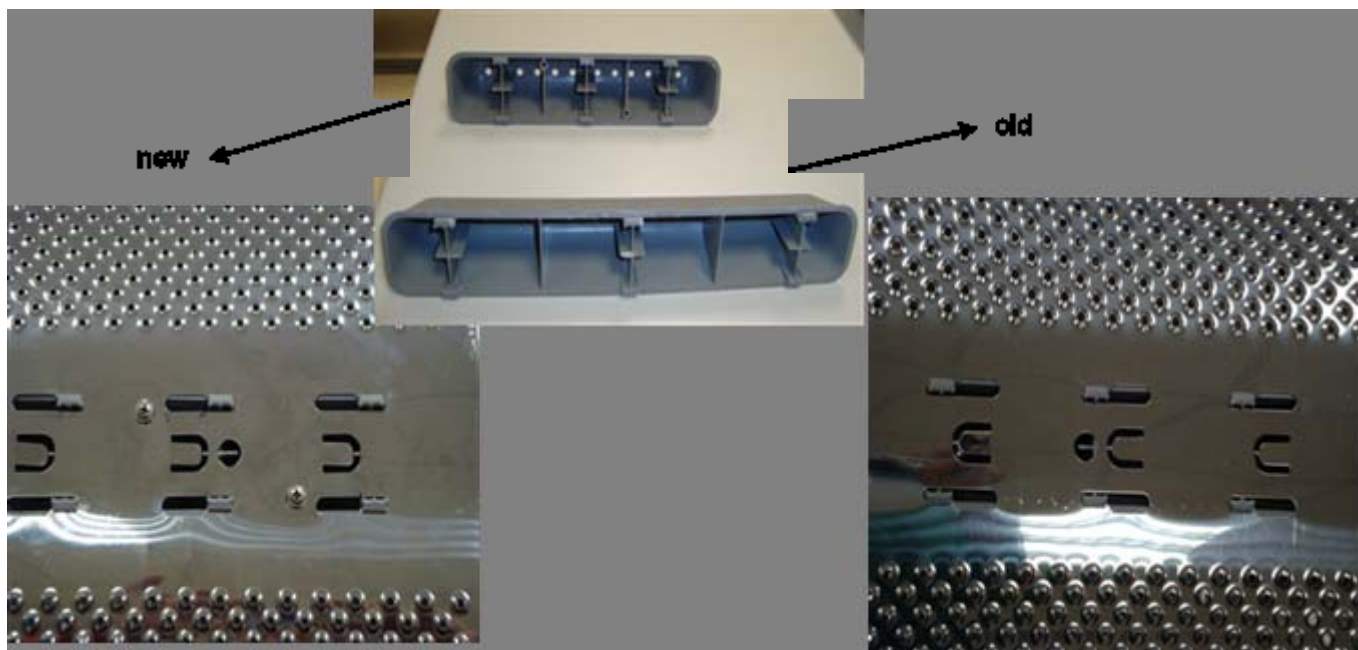

For servicing products produced prior to this date the old baffle (28 1249 03 00) should be used.

Please Note:

New baffles can be used for servicing washing machines produced prior to this date
